New Hi-Temp PVC Slat arrives

Advanced New Product Technology.

Blindware's newly released **Tuscany** slat system is a PVC Foamwood system that features new technology that will change the way blind fabricators think about PVC blind systems. Unfortunately, PVC slat systems have suffered a checkered past, with many high profile failures over the years. The main cause is that these systems have come into Australia with a temperature rating of only 40-45C, which is far from adequate for most areas of Australia.

To create a product with higher temperature rating, Blindware has worked closely with a key supplier to engineer Tuscany to incorporate advanced technologies such as polymer co-extrusion and special high temperature chemical formulation.

The product range includes 8 colours in traditional embossed design, along with 3 whites available in smooth and embossed finish. Of course, this advanced technology has been achieved without losing the price advantages normally associated with PVC slat systems.

AVAILABLE COLOURS

Snow White	Natural
Pearl White	Maple
Oyster White	Red Cedar
Birch	Cherry

All available embossed, Snow, Pearl & Oyster also available in Smooth.

10 new Coil Colours arrive in 25x0.21mm

To add to our existing range of aluminium coil colours, we are pleased to announce the arrival of 10 new top selling colours in 25x0.21mm coil.

Arctic White	Magnolia
White Satin	Gloss Black
White Snow	Bright Grey
Cotton	Bright Sterling
Raw Silk	Black Perforated

Swatch inserts available 8 Oct.

Other key product features include wide 82mm Harbour Bridge Fascia and standard H-type 50mm bottom rail. 63mm slats will be arriving late November in 3 white colours. The woodtone colours also feature a subtle 2-tone grain effect that brings real life to blinds.

Slats are stocked in lengths 2740mm and 1950mm for optimum production yields.

Call today to request samples and more details.
