

Galaxy G-400

FEATURES & BENEFITS:

The new G-400 has a 26-53 lbs. shade capacity with reduced pull forces. The G-400 incorporates RollEase's patented rotating and orbiting planetary gear system combined with Vevetrol™ clutch technology. This higher shade capacity clutch is compacted into the same size as our 24 lb (10,8 kgs) capacity R-24 clutch, making it another excellent alternative solution to motorization.

Clutch Part number (white): **RGAL400W**, (black): **RGAL400BK**
1.5 to 2.5 Inch adapter (natural): **RGAL400A25**, (black): **RGAL400ABK**

G-400 Maximum system weight (minimum holding torque):

- 1.5 inch tube: 53 lbs
- 2.0 inch tube: 40 lbs
- 2.5 inch tube: 32 lbs ***ideal tube because of the chain length run-through***
- 3.0" inch tube: 26 lbs

Pull forces to raise the shade at it's heaviest point (shade fully down):

- 20-lb (9 kgs) shade on 2.5 inch (63,5mm) tube, pull force = 9.0 lb. (4,05 kgs)

The materials used in the construction of the G-400 are designed to give long life and exceptional performance.
