

TUSCANY BLIND SYSTEM

Tuscany is a PVC Foam wood slat system designed for use in the manufacture of wood look-alike blinds having either 50mm or 63mm slat width. The unique combination of polymer co-extrusion and high temperature formulation ensure **Tuscany** performs reliably over a wider range of temperatures and other conditions than previous generations of PVC slat systems. **Tuscany** is very suitable for use in all areas of the home or office, including wet areas.

The **Tuscany** range includes the following basic components:

- 50 x 3.0mm slat
- 63 x 3.0mm slat
- 82 x 8.3mm "Harbour Bridge" valance or fascia
- 50 x 14.5mm H-profile Bottom Rail

Matching valance and fascia are available in all colours and textures.

| Colour | 50mm | | 63mm | |
|---------------------|--------|----------|--------|----------|
| | Smooth | Embossed | Smooth | Embossed |
| Snow White | X | X | X | N/A |
| Pearl White | X | X | X | N/A |
| Oyster White | X | X | X | N/A |
| Raw Cotton | X | N/A | N/A | N/A |
| Moon Stone | X | N/A | N/A | N/A |
| Ash Rose | X | N/A | N/A | N/A |
| Pebble | X | N/A | N/A | N/A |

Tuscany range has several features that provide competitive advantage over other PVC based systems sold in Australia. These include:

- **Tuscany** incorporates leading edge technologies that raise the temperature rating of the product from conventional levels of 40-45C, up to a level of 55C. The specific technologies used include polymer co-extrusion and special high temperature chemical formulation. Co-extrusion incorporates a lighter colour core that is less heat absorbing, combined with an outer PVC skin that carries the slat colouring.
- A contemporary palette of tinted grey colours has been developed to match the modern colour schemes used in many homes today. The palette has been specially developed in conjunction with one of Australia's foremost colour experts.
- Embossed finish is available in 50mm slats in 3 colours – Snow White, Pearl White, and Oyster White.
- 63mm slat allows you to mix 50mm and 63mm blinds using the same product without concerns about matching colours within the same room or house. It also allows you to match 63mm blinds with shutters, when a shutter is not suitable for certain applications.
- 82mm wide valance allows complete coverage of standard high profile 57x 51mm head rail, creating a more finished appearance for certain applications.
- When sold in conjunction with Blindware's **New York** PS slat system and **Paris** natural wood system, retailers and consumers are provided with a very clear Good, Better, Best product proposition.

TUSCANY BLIND SYSTEM

FABRICATION REQUIREMENTS

There are several considerations for fabricators when using **Tuscany** including:

- Standard lengths for cartons of inventory are as below:
Slat – 1930mm and 2750mm
Valance – 2750mm
Bottom Rail – 2750mm
- Recommended tape spacing is 300mm and maximum end route distance is 150mm.

In general, the range of **Tuscany** product is held by Blindware in all national warehouses – located Melbourne, Sydney, Brisbane, and Perth.

COLOUR CO-ORDINATION TABLE

PRODUCT LIMITATIONS

While **Tuscany** is a high-quality product, like any plastic slat product, it can have some limitations in extreme conditions. It is not recommended that dark colours be installed into windows that receive full sun and where the temperature specific may be surpassed.

Tuscany is rated at 55C and temperatures in excess of this may cause permanent damage to the product.

PRODUCT WARRANTY

Tuscany is provided with a 1-year warranty, subject to Blindware Warranty Terms and Conditions.
