

**PRODUCT OVERVIEW**

**SunBoss** Holland Springs are used to manufacture spring-return blinds that are lowered by pulling down on the base rail or an attached pull-cord and raised again with a slight downward tug and release. **SunBoss** Holland Springs are available in Light, Medium and Heavy-duty versions that allow blinds to be made from 400mm to 3000mm wide.

Holland Springs are configured for LH Standard-Rolled (Back-rolled) operation but can be easily used for Reverse-Rolled (Front-rolled) operation by positioning the spring unit on the right side of the blind.

The **SunBoss** Holland Spring is a cost-effective way to manufacture roller blinds that are also inherently child safe when made without using a pull-cord. For premium applications, the Holland Springs can also be paired with a **SunBoss** speed reducer to control the opening speed of the blind, plus to always stop at a predetermined upper position.

**FEATURES & BENEFITS**

|                       |  |
|-----------------------|--|
| <b>MODULAR DESIGN</b> | <ul style="list-style-type: none"> <li>Adaptable in all tube sizes (38mm, 43mm, 50mm, 63mm and 40mm/45mm UNI tubes).</li> </ul>                      |
| <b>VERSATILE</b>      | <ul style="list-style-type: none"> <li>Can be used in conjunction with all single and double bracket options, plus fascia, cassettes etc.</li> </ul> |
| <b>EASY TO USE</b>    | <ul style="list-style-type: none"> <li>Smooth, simple operation.</li> </ul>  |
